

PRE-INSULATED MASONRY

CEU CREDITS: 1 LU | HSW

This course addresses the energy efficiency of pre-insulated masonry wall systems and Energy Code compliance of using such systems. The course also covers thermal performance measures and how to obtain Code-Compliant values for these measures, how to detail pre-insulated walls, and current topics in materials transparency and sustainability.

Objectives:

- Understanding features of pre-insulated concrete masonry wall systems
- Code compliance and thermal mass concepts
- R-values vs. marketing terms such as “Effective” R-values in the specification process
- Detailing for the performance of Single Wythe pre-insulated walls
- Current topics in sustainability and material transparency
