## Salt Barrier

### PROJECT SPOTLIGHT · BURNSVILLE POLICE DEPT., BURNSVILLE, MN

The Burnsville Police Department in Burnsville, Minn., needed updates around its building as harsh weather and the use of deicing chemicals were taking a toll. Using the PaveDrain permeable pavement system from Amcon Concrete Products, the job was completed by sealing the PaveDrain pavers with Tenon Salt Barrier. Designed to extend the life of concrete in areas that suffer from the effects of damaging salts and deicing chemicals, Salt Barrier was the ideal product for the job. Salt Barrier leaves no residue behind and helps prevent efflorescence, erosion, and spalling when applied. Ready for traffic in just 2-4 hours, the police department saw minimal downtime during the application process.
